Description

In this course, students will begin to combine their understanding of scales, melody, harmony, and chord progressions in the context of tonal music. Students will become fluent in the use of triads and seventh chords in all inversions, and they will begin applying these chords with correct voice leading. This course also covers chromatic harmony with a means to develop a richer harmonic understanding through various musical contexts. Students will continue to train rhythmically by means of clapping exercises, rhythmic dictation, and listening examples.
